

The ACTS CSI Advantage

FIRE RETARDANT * WATER PROOF * INFRARED STABLE * THERMALLY STABLE
BULLET PROOF CAPABLE * CHEMICAL RESISTANT
DOES NOT ROT OR DECAY * ULTRAVIOLET RAY REFLECTIVE
MOLD—MILDEW RESISTANT * TERMITE—VERMIN PROOF

Temporary And Permanent Uses

Residential

- Single Family
- Multi-Family

Medical

- Triage Facilities
- Clinics
- Veterinary Hospital
- Mortuary Support Shelters
- Decontamination Shelters

Emergency & Disaster Relief

- Operations Centers
- Food Distribution
- Disaster Relief Shelters
- Worker Camps
- Housing

Schools

- Classrooms
- Day-Care Centers
- Cafeterias
- Dormitories

Military

- Command & Control Centers
- Communication Centers
- Canteen Facilities
- Housing

Commercial

- Retail
- Office Suites
- Hotel/Motel
- Warehouses

Advanced Building Technology at work for you

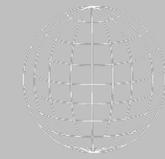

99+ YEAR LIFE EXPECTANCY

98% RECYCLED CONTENT

98% RADIANT

CerarMix™ Housing structures are “game changing.” We provide an alternative to the current temporary to permanent building products. The CerarMix™ Housing products are unique. Our construction process is patented and our CerarMix™ technology creates structures of unparalleled strength and durability that far exceed building of conventional materials. ACTScsi specializes in the design and manufacture of custom, factory built, transportable buildings. ACTScsi’ experienced team of engineers, designers, production crews and project managers all work to provide a new and unique product. Our buildings can be assembled in a very short period of time.

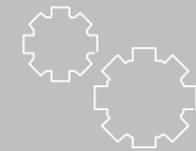

ACTScsi’ innovative, flexible designs along with the highest quality materials ensure building at the best price in the fastest timeframe. “We help our customers rethink what is possible in building design and functionality, and we are poised to meet the needs of the global market, no matter how challenging the location or the environment.” From concept to completion, our experienced team of professionals can work with you to ensure you receive precisely the product you need. With ACTScsi, you receive top quality buildings and service with the permanence and performance of the latest in advanced building techniques.

ENVIRONMENTALLY SUSTAINABLE

Because buildings can be a primary consumer of energy, much emphasis has been placed in creating the best-in-class energy efficiency that exceeds most local energy compliance requirements.

UV Stability
Thermally Stable

CERARMIX™ TECHNOLOGY

CerarMix™ uses patented unique technology to cross link polymers, ceramics and metals in order to meet specifications that exceed those of conventional materials. CerarMix™ provides superior abrasion, corrosion, and erosion resistance, structural strength and fire retardancy. It dramatically reduces manufacturing costs and the use of petroleum-based plastics.

CUSTOM SOLUTIONS

Customizable features include cladding that can be made to resemble stone, brick, concrete, wood, and other surfaces without the expensive associated costs. Desired finishes and patterns are available for floors, walls, kitchen countertops and other decorative components.

Maintenance Free
Color-fast
Never Fades

TEMPORARY TO PERMANENT STRUCTURES

- READILY AVAILABLE.
- SIMPLE AND EASY ASSEMBLY.
- RAPIDLY DEPLOYABLE.
- EQUIPPED WITH ELECTRICAL, PLUMBING AND HVAC
- LOW COST SOLUTION.
- USE ANYWHERE IN THE WORLD
- IBC BUILDING CODE COMPLIANT.
- TRANSPORTABLE. REUSABLE.

When Timing is Critical and quality is important

Consulting Services

ACTScsi has a highly experienced team of engineers and project managers. We offer comprehensive business planning for your project. Consulting services are available for a variety of topics including building codes and zoning. Our design services can turn your initial concepts into a working operation in days rather than weeks. When you purchase a CerarMix™ structure we become a partner in your idea and your vision. We work closely with you through all the steps of the project so that together, we can help turn your vision into reality. By choosing ACTScsi, you will receive exemplary customer service. From start to finish, we have the experience to help in the design and management of your project. Our expertise will ensure that the fabrication, shipping, delivery, and managing the assembly process of your project exceeds your expectations.

Environmental Commitment

Our environmental commitment is a way of life. This commitment extends across all of our operations and through the full life cycle of our products. We are developing and managing our technologies to deliver the right building, at the right time. To reduce manufacturing waste we continuously refine the building process, recycle materials and work to recover energy where possible.

PATENTED TECHNOLOGY - SUPERIOR QUALITY ENERGY EFFICIENT, LOW MAINTENANCE

Unique Fabrication Process

Our state-of-the-art fabrication facilities integrate the best practices in design and workflow. This process integrates the building’s skin with the steel frame design. Each structural component is built to comply with location and environmental. specifications. The unit’s unparalleled strength is the result of combining a bio-fiber core with an integrated reflective media.

All units are self-contained with little to no structural modification required once delivered to the site. Set-up costs are kept to a minimum due to quality engineering. Panel construction allows structures to be fully customizable and can be assembled in hours. The environment does not hinder the structure’s performance.

The ACTScsi structures are at their best in the most challenging environments. No matter where our structures are called on to perform they will stand up to the most extreme circumstance. Hazardous forward locations, locations in extreme heat or cold or locations where maximum security is required are all environments where the AI structures excel and where our CerarMix™ process provided a construction methodology unparalleled by any other process.
